About me

Computer Engineering graduate and Full-Stack Developer with professional experience building custom Shopify themes and responsive interfaces. Develops independent web applications using React, Next.js, TypeScript, Python, FastAPI, and PostgreSQL. Project experience includes REST APIs, authentication, role-based access control, and client-side encryption across budgeting, event management, and journaling applications.

Education & Training

Language Certificate | Manisa Celal Bayar Üniversitesi Yabanc1 Diller Yüksekokulu

Final grade: 93

Bachelor's Degree in Computer Engineering | Manisa Celal Bayar Üniversitesi | 13/09/2021 - 06/06/2025 | Manisa, Türkiye

Level in EQF: 6

Work experience

Web developers | Businessup | MUGLA, Türkiye

Junior Full-Stack Developer | February 2025 – August 2025

Part-Time Full-Stack Developer | September 2024 – January 2025

Full-Stack Development Intern | July 2024 — One-month internship

- Developed custom Shopify themes.
- Built dynamic media galleries and filtering interfaces using Shopify Metafields to organize and display archival content.
- Contributed to the Atatürk Digital Archive by developing responsive interfaces for browsing historical materials.
- Translated existing retail website designs into responsive Shopify storefronts tailored to client requirements.
- Debugged interface issues and maintained Shopify themes across desktop and mobile layouts.

Projects

Budget Buddy — Personal & Family Budget Application | 10/01/2025 - Current

Developed a personal and family budgeting application with role-based access control, receipt uploads, and CSV export. Integrated AI-assisted explanations to help users interpret financial information.

Technologies: Next.js, Supabase, PostgreSQL, Supabase Auth, Tailwind CSS.

Pin & Paper Journal — Encrypted Visual Journal | 10/02/2026 - Current

Built a visual journaling application supporting text, photos, stickers, drawings, and templates. Implemented encrypted cloud backups with client-side key protection using the Web Crypto API.

Technologies: Next.js, TypeScript, Supabase, Web Crypto API.

Luma — Event Management Platform | 01/01/2026 - 20/08/2026

Developed an event platform with personalized digital invitations, guest RSVP workflows, and shared photo galleries. Built responsive guest interfaces and a separate administration experience.

Technologies: JavaScript, Python, FastAPI, PostgreSQL.

Be a Real Developer — Developer Learning Platform | 07/09/2026 - Current

Developed a bilingual developer practice platform featuring executable coding tasks, skills assessments, and personalized learning paths. Added technical reviews and optional AI feedback to support practical learning.

Technologies: JavaScript, Node.js, SQLite / D1, QuickJS, OpenAI API.

Navilo — Personalized Food & Cosmetics Ingredient Scanner | 11/10/2026 - Current

Developing a mobile application that evaluates food and cosmetic ingredients against user-defined preferences. Integrated barcode-based product lookup, Google ML Kit OCR, and a personal product library with offline access. Connected a shared catalog using Supabase and PostgreSQL; product and photo contribution workflows are in progress. Ingredient summaries communicate uncertainty when available data is insufficient.

Technologies: Flutter, Dart, Google ML Kit, Open Food Facts, Open Beauty Facts, Supabase, PostgreSQL.

Rogi — Website Audit Tool | 05/10/2026 - Current

Developed a bilingual website audit tool offering SEO analysis, source code inspection, and pre-launch security and mobile usability checklists.

Technologies: JavaScript, Node.js, Cloudflare Workers, HTML, CSS.

Skills

web programming | develop software prototype | CSS | e-commerce systems | Shopify -Liquid | eCommerce tools (Shopify, Prestashop...) | JavaScript | Java (computer programming) | Basic Python, Java, Javascript, HTML, CSS, NodeJS | C++ | Supabase | SQL | SQL Server | database | manage database | MySQL | analyse software specifications | Metafields | PostgreSQL | FastAPI | Node.js | Next.js | React

transcript

transcript | 09/2020 - 06/2025

Official academic transcript of my Bachelor’s degree in Computer Engineering, including courses taken, grades received, and overall academic performance. The coursework includes subjects such as Data Structures, Algorithms, Object-Oriented Programming, Database Systems, Software Engineering, Computer Networks, Operating Systems, and Web Development.

Volunteering

GETEM — Boğaziçi Üniversitesi | 01/02/2021 - Current

Teaching creating mini games with Scratch programming to secondary school students | Manisa

As a team, we conducted Scratch programming sessions for middle school students as a part of our social responsibility initiative. Following the lessons, we solidified our newfound knowledge through engaging games.
